

Modern Biotechnology: Trends And Principles

By Sujata K. Dass

2004. Hardcover. Book Condition: New. 310 Biotechnology is the term for a group of technologies that pursue the understanding and use of organisms and biological processes for health, social, environmental or economic applications or outcomes. Modern biotechnology includes techniques ranging from molecular and cellular biology, biochemistry and immunology through to biological applications of information technology. The present book provides an in-depth analysis of the trends and principles of modern biotechnology. Researchers, academics, scientists, policy-planners and administrators will find this work informative and useful. About The Author:- Sujata K. Dass was born in a family of bureaucrats and social workers on July 19, 1965 in Kabul, Afghanistan. She joined Queens College of the City University of the New York for B.S. degree. She joined King George Medical College, Lucknow and completed her MBBS in 1988-89 and thereafter, completed her Ph.D in Medicine. She was Clinical Observer/Visiting Fellow in the Department of Cardiovascular Surgery at Memorial Sloan Kettering Cancer Research Institute (Memorial Hospital) of Cornell University, New York during 1991-92. Dr. Sujata was a Research Fellow at The New York Presbyterian Hospital-Medical College of Cornell University. She was appointed Dr. B.R.Ambedkar Chair Professor at the young age of 36 years. She is...

Reviews

An incredibly amazing ebook with perfect and lucid answers. It is written in basic terms and never difficult to understand. It has been written in an exceptionally basic way and it is only right after I finished reading this ebook in which it in fact modified me, affected the way I really believe.
