

## Hand book of chemistry Volume 7

By Leopold Gmelin

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 254 pages. Dimensions: 9.7in. x 7.4in. x 0.5in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1852 Excerpt: . . . issues a mixture of 875 vol. marsh-gas and 12-5 air, which, if set on fire, continues to burn with a yellow flame for five weeks; the gas issues in largest quantity and with greatest force from the stream itself. (Th. Thomson, IV. Ed. Phil. J. 1, 67. )--The gas which maintains the Sacred Fire of Baku, is marsh-gas, mixed with 6 per cent, of nitrogen, and from 1 to 5 per cent, of carbonic acid, also with vapour of rock-oil; hence the gas, when analyzed by means of oxide of copper ignited in a tube, yields too much carbon (775C and 22-5H). (Hess, J. pr. Chem. 13, 514. )--IF A remarkable evolution of gas from the earth has been observed at the village of Charlemont, in Staffordshire; a workman was led to the discovery of it by the absence of all vegetation near the spot. By...
